

SAFE_{dy}

**Product protection signed and sealed:
Whoever relies on product security,
relies on SAFE_{dy}!**

Utilising its inner strength: SAFE_{dy} provides maximum product protection through specially coated films. Neither water nor air nor gases come into contact with your product. Thus optimising the storage security and shelf life of your products – and of course the safety of your customers. Whether you are looking for odour protection for foodstuffs, protection for products that age quickly in the air or a gas barrier, the construction can be individually tailored to your needs providing absolute SAFE_{dy}!

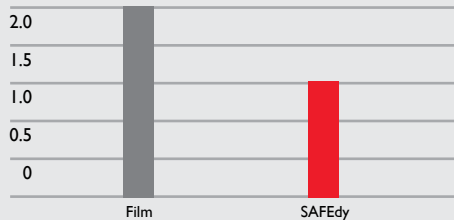

SAFE_{dy} – for sensitive bulk goods

Filling speed

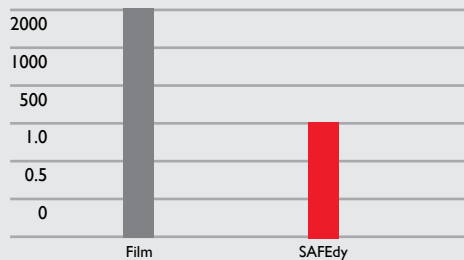

Water vapour transmission rate

The water vapour transmission rate is considerably lower in the use of SAFE_{dy}.

Gas and aroma barrier

As gas and aroma barrier SAFE_{dy} gives greater protection than a conventional film.

The advantages of SAFE_{dy} at a glance

- Maximum product protection
- Significant improvement to shelf life and durability of your products
- Depending on the configuration, can prevent moisture, air and/or Gas penetrating the sack
- Highest aroma protection
- We configure the coating according to your needs
- Absolutely suitable for all filling machines – no elaborate change-overs necessary
- Available for all dy-pack bag variants and sizes
