

The Elite-Thermo-Valve

The Brand New Elite-Valve from dy-pack! More Reliable Sealing and Higher Productivity

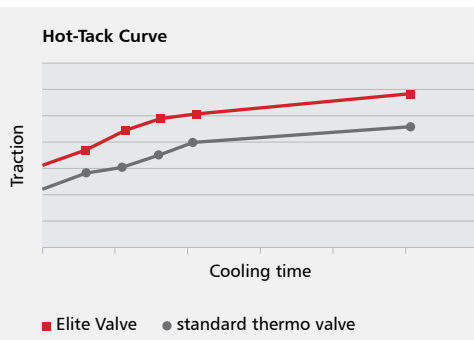

Dy-pack are pleased to introduce another step forward in packaging technology. With the new petty patent protected Elite-Valve from dy-pack you will be making a positive change to the technology used in your packaging process. The new Elite-Valve design sets new standards in the security, cleanliness and reliability of sealing. In using a sack with this valve it is possible to deliver real improvements in efficiencies every day within your filling process.

The consistent thickness of the valve guarantees optimal seal strength.

The Elite-Thermo-Valve

The Hot-Tack curve shows the strength of the seal over time after sealing.

The Advantages of the Elite-Valve

- Can be employed on all types of thermo seal packers
- Rigid construction resulting in better opening and shape
- Greater reliability of application
- A more consistent and cleaner seal
- Improved productivity – less downtime

Recommended Application

The Elite-Valve can be used whenever quality of product protection and presentation is paramount. For everyone in the chemical and food industries the concept delivers a quantum leap forward in many crucial performance parameters.
